About Me

Software professional with expertise in MERN technology, HTML, CSS, and JavaScript, and experience in solving more than 450+ DSA problems. Looking forward to being a part of an organization that allows constant learning and development of my technical and management skills. Experienced in working on various projects through remote collaboration.

Projects

Quora - Clone

Quora is a social media website to gain and share knowledge. Here users can ask questions and get answers on a variety of topics.

Tech Stack: HTML | CSS | JavaScript | React | Redux | NodeJs | ExpressJs | MongoDB

Group Project: 4 Collaborators | **Duration:** 5 Days

Areas of responsibility:

- Developed the Login/Signup Page with user authentication.
- Developed the Answers page where users can see the questions and provide answers to them.
- Developed the functionality to add a new question or a new post.
- Developed the Backend application with proper data flow.

MyFitnessPal - Clone

MyFitnessPal is a health and fitness tracker application.

Tech Stack: React | Redux | HTML | CSS | JavaScript

Group Project: 4 Collaborators | **Duration:** 5 Days

Areas of responsibility:

- Developed the Food Diary page where the user can log all the food items consumed during the day and calculate the calories and macros gained.
- Developed the printable Reports page where the user can see his food chart, food notes, exercise chart and exercise notes for each day and generate a report for the same.

Asos - Clone

Asos is an online clothing and accessories store for men and women.

Tech Stack: HTML | CSS | JavaScript

Group Project: 5 Collaborators | **Duration:** 5 Days

Areas of responsibility:

- Created and Deployed the mock database.
- Developed the Individual Product Page where the user arrives upon selecting a particular product. Here, the user can see all the details related to that product like the image gallery, price, material details, brand details, etc., and add the product to his wishlist or cart.
- Developed the search bar functionality where users can search products by category.
